

When you combine the magic of virtual reality with the thrill of waterslides, an entirely new dimension of fun is unlocked. Pairing incredible visual experiences with tactical, sensory elements is a cutting edge art that produces a truly memorable experience, which must be felt to be believed. We've partnered with aquatic virtual reality

experts, Ballast, to design an advanced VR system that can be adapted to work with any existing waterslide. Our secret lies in creating expertly designed content which is accurately mapped to the movements of each slide, controlled by a revolutionary tracking system that is simple to install and monitor.

## VR WATERSLIDE TECHNICAL DETAILS

Simplicity is key. Our real-time rendered experiences are designed not to overwhelm, but to enhance each rider's experience, allowing them to focus on beautiful virtual worlds and be pleasantly surprised throughout the ride. We've designed a unique headset that is comfortable, lightweight, waterproof and easy to maintain. And while our tracking system is complex

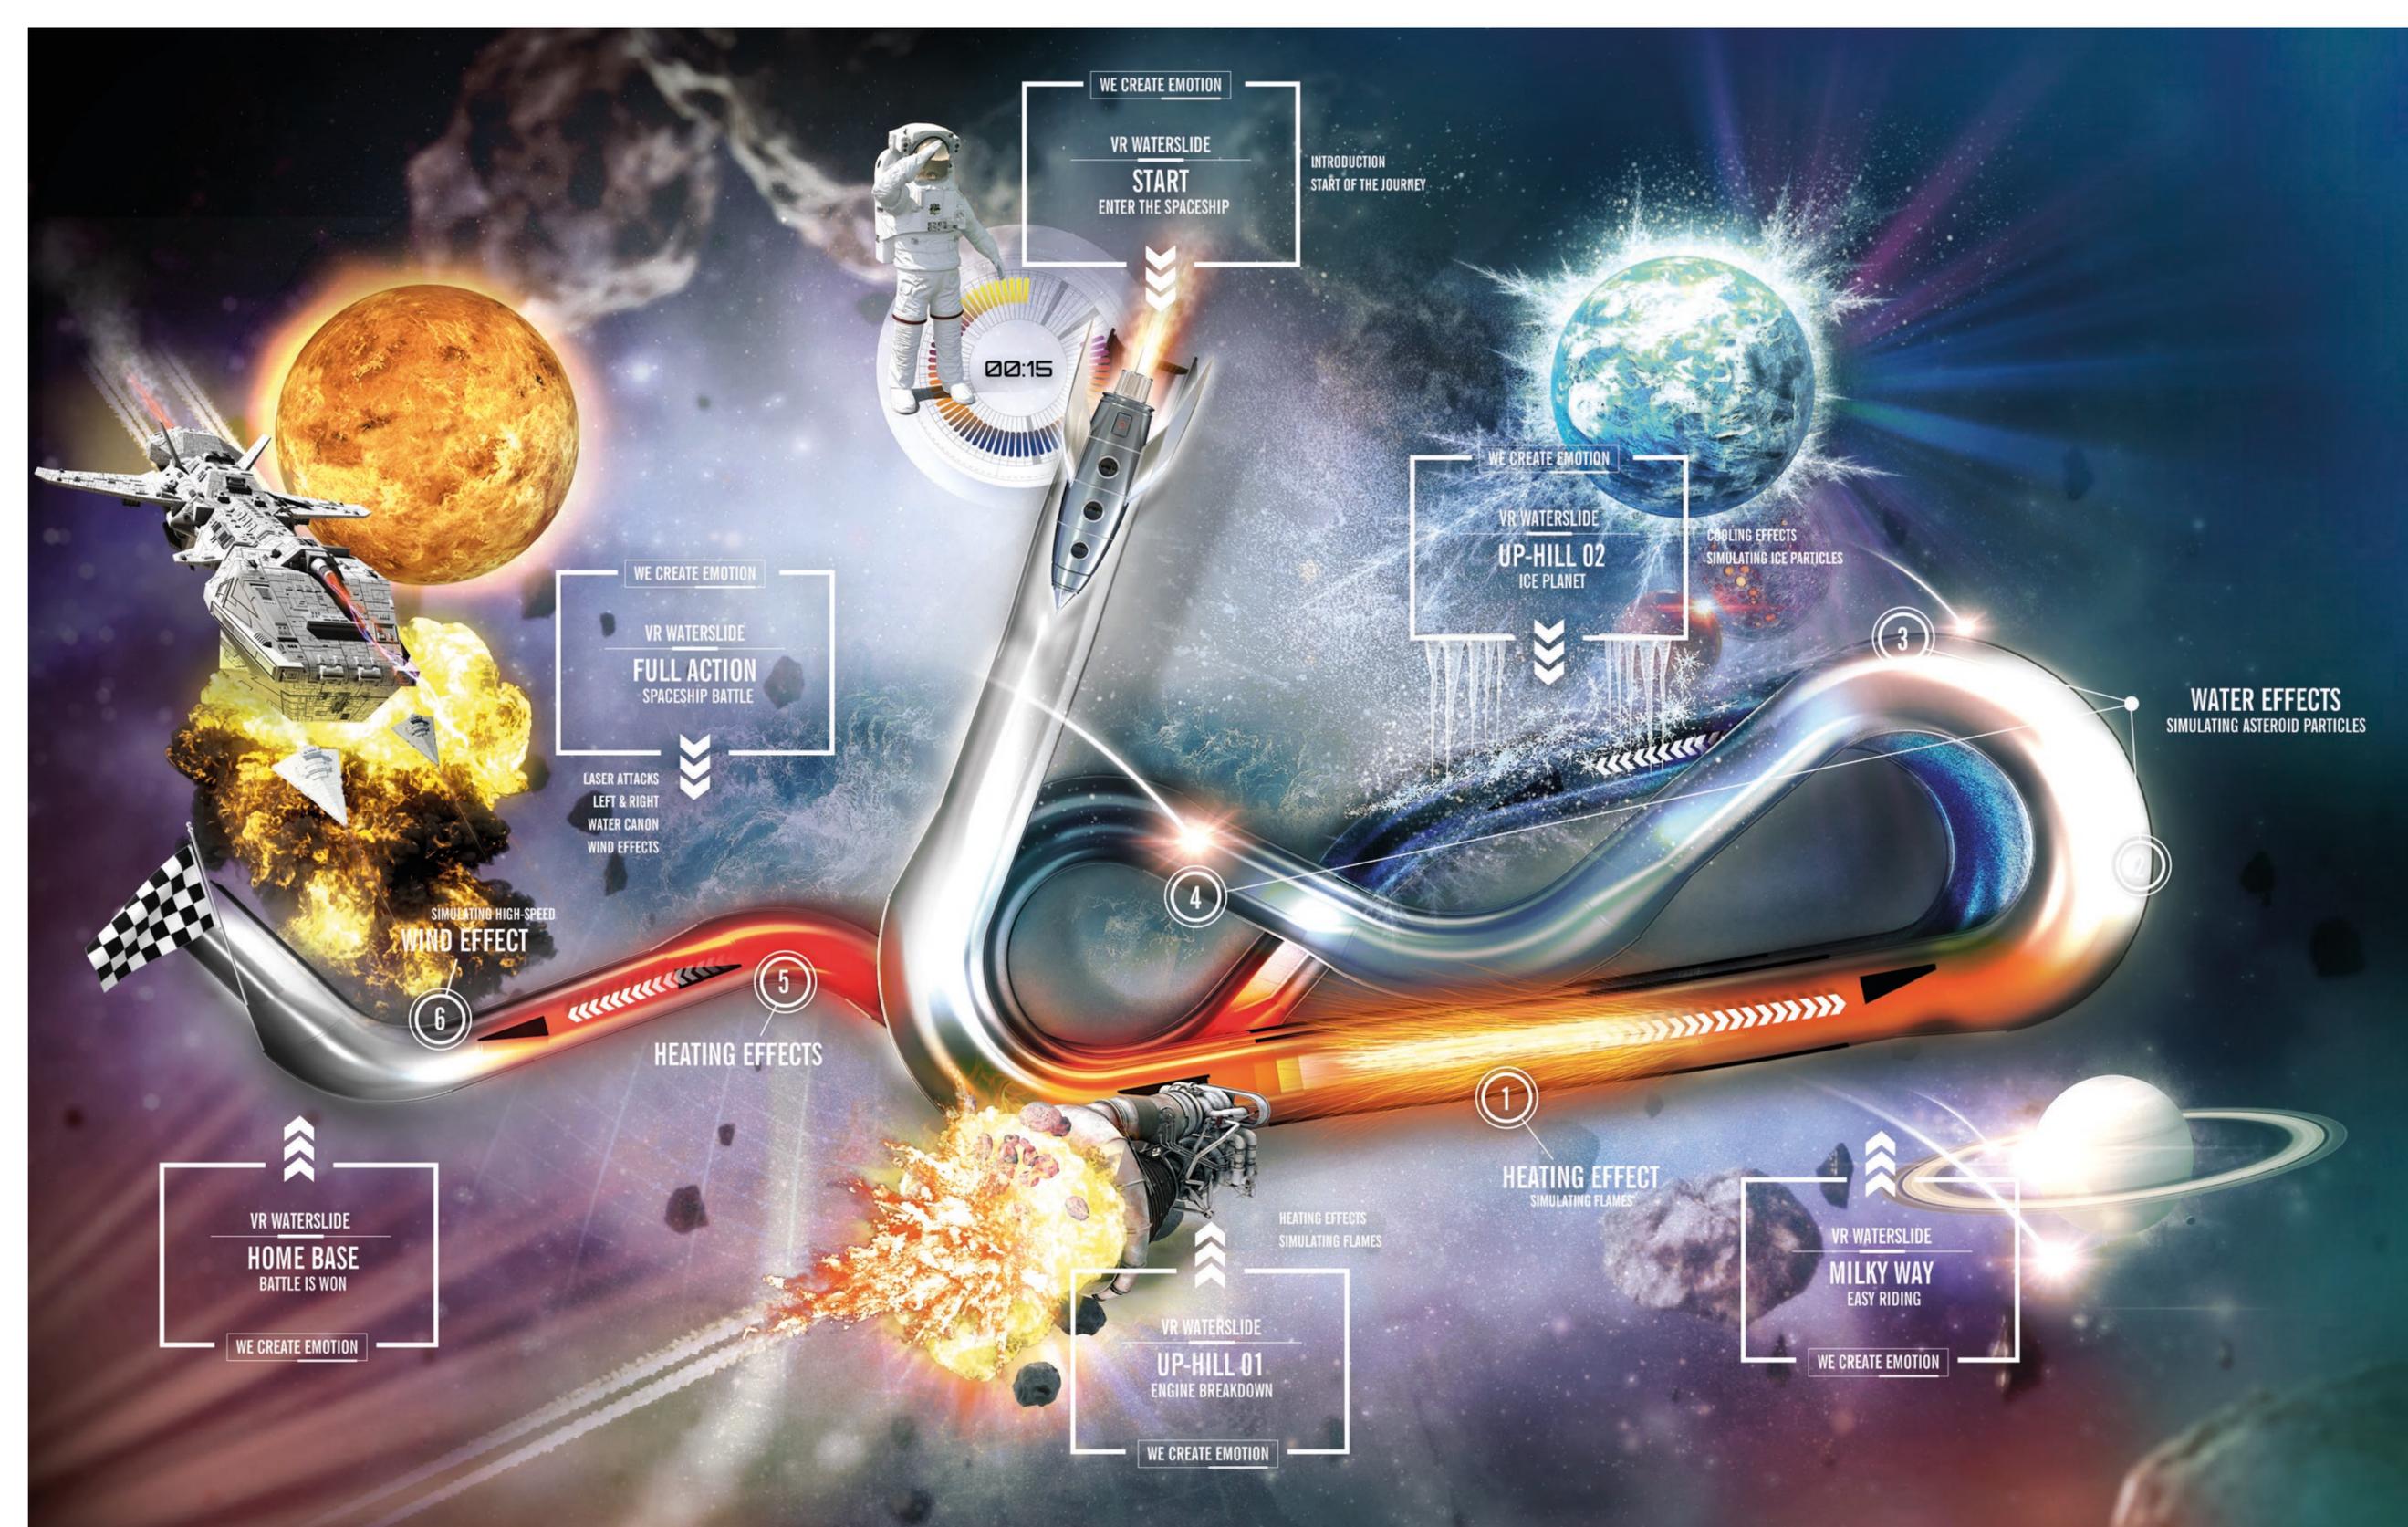

on the inside, it's unobtrusive and simple to operate. Because this system was designed by tech experts with a cutting edge outlook, experiences can be added and refreshed as needed. Visitors will have a reason to come back every season to discover a new story and take in a new experience. We invite you to come on a memorable journey that appeals to every sense!
